There is a significantly higher satisfaction with the Top 5 Accessories compared the the Top 5 Shoes. Less people are looking to invest in the accessories, however, for those who do, they spend on par or close to the same as the shoe customer. Dig into what is impacting the satisfaction of the highest costing shoes products.

Demographic Analysis

Assessment

Total Sales are dominated by the Men's and Women's demographic category. Almost triple the growth compared to the next two highest categories, which are kids and originals.

While this may look odd, the overall demographic of the customer base is highly favored towards Men's and Women's Category.

Recommendation: Dig into why the why the women's category is below the average satisfaction level. Increasing this customer base satisfaction will create a returning customer and drive more sales.
